DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 24-27 recite the limitation "the ring" in line two of the independent claims. There is insufficient antecedent basis for this limitation in the claims.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-15, 21, 24-27, 34-38 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6, 8-43 of copending Application No. 10/353,325. Although the conflicting claims are not identical, they are not patentably distinct from each other because

one having ordinary skill in the art would find the differences between the claimed inventions obvious.

The copending claims don't disclose the plurality of posts projecting from the support member with a plurality of contacts mounted to the posts. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the claims of the copending application with the teachings contained in the claims, because claim 6 recites discrete fingers that are separate from one another and attached directly to the support member.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 39, 40, 53-60, 65-73 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 80-108 of copending Application No. 10/409,690. Although the conflicting claims are not identical, they are not patentably distinct from each other because one having ordinary skill in the art would find the differences between the claimed inventions obvious.

The copending claims don't disclose the plurality of posts projecting from the support member with a plurality of contacts mounted to the posts. It would

have been obvious to one having ordinary skill in the art at the time the invention was made to modify the claims of the copending application with the teachings contained in the claims, because claim 87 recites the posts with at least one conductive arcuate element attached to the posts that are separate from one another and attached directly to the support member.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be

calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
